

Compact 10 HD Speech

**The new standard of portable
magnification and Speech
in tablet format**

Optelec

**Simple and effective solutions for the
blind and visually impaired**

With its large 10" screen, customizable features, intuitive operation, and full page Text-to-Speech, the Compact 10 HD Speech offers all benefits of a desktop video magnifier, but in a much smaller, foldable, and portable design.

Listen as text is read to you

The Compact 10 HD Speech's unique swing-out effortlessly captures full page documents and reads them to you. The convenient indicator at the base of the Compact 10 HD Speech tells you exactly where to place the document you want to read.

Viewing objects and photos

With the arm unfolded, you can easily look at photos, view medicine packaging, read round cans, and even write your signature, without being restricted in your movements.

Easy reading

Compact 10 HD Speech has a large, High Definition 10" touch screen. This allows you to fit more text on the screen for maximum overview. With more words on the screen simultaneously, you will find that reading and understanding text becomes easier – even in high magnification.

Ready when you need it

The Compact 10 HD Speech instantly powers on. Thanks to this incredibly short start-up time, you won't waste any time and you can continue reading almost immediately.

Key benefits

- **View and magnify text and objects and enjoy full page Text-to-Speech**
- More words on screen thanks to the large, 10" touch screen
- **Easy switching** between Easy and Advanced Mode:
 - **Easy Mode** for increased ease-of-use: contrast and magnification only
 - **Advanced Mode** for additional functions: menu, clock, and extra options
- 3 cameras - each serving a specific purpose
 - **Reading camera:** Read and listen to documents at a table or desk
 - **Swing-out camera:** Full page Text-to-Speech and writing signatures
 - **Overview camera:** See objects and text from a small distance
- **Continuous zoom:** <0.5 to >22 times magnification
